## PROFESSIONAL SUMMARY

Product Manager with 4+ years of experience across SaaS analytics and consumer products. Proven track record in roadmap planning, experimentation, and cross-functional delivery with engineering and design teams. Skilled at turning funnel and cohort insights into product decisions using SQL, Tableau, and Python.

## SKILLS

**Product & Roadmap Management:** Product Strategy, Roadmap Planning, PRDs, User Stories, Acceptance Criteria, Backlog Prioritization, Market & Competitive Research, Agile/Scrum, Stakeholder Management  
**Data & Analytics:** SQL, Tableau, Power BI, Python (Pandas, NumPy), AWS (Athena), Snowflake, A/B Testing & Experimentation, Funnel & Cohort Analysis  
**AI & Technical Platforms:** Generative AI, RAG Pipelines, Agentic AI, Delta Lake, Data Modeling, APIs  
**Tools:** Jira, Git, Lucidchart, Figma

## EXPERIENCE

- Northwind Analytics**  
*Technical Product Management Intern*

Apr 2026 – Present  
Austin, TX

  - Produced client-facing technical documentation, architecture summaries, and workflow explanations for a data platform used by enterprise customers, reviewed by senior team members before hand-off.
  - Built a proof-of-concept data foundation with ingestion pipelines and Delta Lake tables that unified fragmented delivery and financial data into dashboards for telemetry-driven insights and predictive signals.
  - Contributed to a canonical data model unifying seven enterprise source systems into three analytics ontologies, and supported Agile delivery by writing user stories and acceptance criteria for the engineering team.
- Bluebird Media Group**  
*Associate Product Manager*

Feb 2023 – Oct 2025  
Denver, CO

  - Identified declining user retention on a streaming platform through funnel and cohort analysis, and defined roadmap priorities to reduce drop-off, translating insights into PRDs for personalization features (150K+ MAU across web and mobile).
  - Drove the product direction for a content recommendation system, defining success metrics and running 3 A/B test variants to refine ranking, contributing to an 18% retention improvement and 12% revenue growth.
  - Built the business case for a food delivery loyalty program and launched tailored offers, improving conversion across the ad to order funnel and increasing high-value actions by 30%.
  - Ran 6+ A/B experiments (offers, ad creative, loyalty mechanics, install prompts) and wrote SQL across multi-source datasets for cohort analysis and experiment evaluation in Tableau.
- Skyline Travel Data**  
*Product Marketing Analyst*

Jun 2022 – Dec 2022  
Chicago, IL

  - Built forward-looking demand models in Python and SQL to support airfare pricing, moving stakeholders from retrospective reporting to decision-ready intelligence across markets and planning windows.
  - Delivered real-time demand and pricing dashboards (AWS Athena, Power BI) and integrated the analytics into product workflows.
- Cedar Software Ltd**  
*Software Developer*

Jun 2019 – Feb 2020  
Pune, India

  - Developed backend APIs and supported web application features, while collaborating with engineering teams on deployment workflows.

## PROJECTS

- Project Beacon – Agentic AI Research Assistant (@Github)**
  - Designed and built an agentic AI research assistant with a multi-agent architecture, RAG pipelines with semantic retrieval, and validation layers on a scalable backend supporting near real-time analytics.
  - Conducted competitive research, feature prioritization, and market sizing for AI-assisted research tools, evaluating user needs for retail investors.

## EDUCATION

MBA, Product Management | Example State University | Jan 2026 – Dec 2027  
MS, Information Systems | University of Example | Jan 2021 – Dec 2022  
B.Tech., Computer Engineering | Example Institute of Technology | Jun 2015 – May 2019
